### Brief Description of Activities :

**Research:** "Prevention of Child Injuries through Social-intervention and Education (PRECISE)" is the main research activity of the Organisation. PRECISE has the following components - Home Safety, School Safety and Community Safety. Activate Bangladesh - Campaign for promotion of sports and activities among Bangladeshi young is also an ongoing research programme of the Organisation. The Organisation is also developing hospital based injury surveillance system in collaboration with WHO, Geneva. Moreover CIPRB is providing technical support to different Organisations to conduct research work on health issues as collaborator.

**Training:** Short course on Injury Surveillance System and short course on Injury Epidemiology

**Materials Development:** The materials have been developed by the Organisation are Home Safety card, Video on drowning, RTA, and burn, Counselling on flip chart & flash card, Poster, Advocacy booklet on injury prevention, Grade Specific injury prevention books for grade I to grade VIII, Teachers training manual on injury prevention, Teachers guide on injury prevention, Crèche mothers training manual, CIPP counselling manual, Swimming learning manual, Paramedics training manual on first aid & Advocacy materials of the Organisation.

**Other:** CIPRB is involved in Human Resource Development in injury and other public health research in collaboration with various internationally renowned universities e.g. Karolinska Institute.
